

GRO CUMARU TILES

GRO Cumaru Wood Deck Tiles for use in both flat and sloped roof applications, terraces, plazas, and patios are designed to be used with fixed or adjustable height pedestals. Like GRO IPE Deck Tiles, GRO Cumaru Deck Tiles are structural tiles made from choice South American hardwood slats and secured to three solid wood support battens with stainless steel screws. GRO Cumaru Wood Deck Tiles provide durability and hardness, and are a good Value Engineered (VE) option for Brazilian hardwood applications.

MATERIAL / BOTANICAL NAME	Cumaru, Brazilian Teak / Dipteryx odorata
DIMENSIONS	24" x 24" x 1 ⁵ / ₈ "(nominal); 23 ⁷ / ₈ " x 23 ⁷ / ₈ " x 1 ¹ / ₂ "(actual)
WEIGHT	23.5 lbs.
COLOR / GRAIN	Golden tan to dark reddish brown Dark grain accents
SURFACE FINISH	Grain is interlocked with medium texture
DURABILITY / RATING	Class A
HARDNESS (JANKA)	3,540 (very hard)
CHARACTERISTICS	Resists bending, shearing, warping & twisting Low maintenance than less dense species Wear and scuff resistant Very hard and dense Resists termites, decay, and mold Weathers without splintering
ACCOMPANYING GRO PRODUCTS	GRO PEDESTALS, GRO FASTENING KIT
