

GRO FSC® ITAUBA TILES

GRO FSC® - C108155 Itauba Wood Deck Tiles are structural deck ties designed for both flat and sloped roof areas, decks, plazas, or patios. GRO FSC® Itauba Wood Tiles look similar to Ipe and are a good Value Engineered (VE) replacement option. When supported with GRO Fixed Pedestals, both height and slope adjustments can be made easily and in small or large increments. In decking applications, incorporating GRO Fasteners can help mitigate wind uplift and movement and create a secure system. Made from choice Brazilian hardwood, the tiles are comprised of slats secured to three solid wood support battens with stainless steel screws. GRO FSC® Itauba Wood Tiles are FSC® certified and GRO is an FSC® certified company.

MATERIAL / BOTANICAL NAME	Itauba / Mezilaurus itauba
DIMENSIONS	24"x 24"x1 1/2" (nominal); 23 7/8" x 23 7/8" x 1 5/8" (actual)
WEIGHT	23.5 lbs.
COLOR / GRAIN	Typically yellow brown to dark lustrous brown
SURFACE FINISH	Ends waxed with paraffin and slats with machined finish
DURABILITY / RATING	Class A
HARDNESS (JANKA)	2900 (very hard)
CHARACTERISTICS	Resists bending, shearing, warping, and twisting Wear and scuff resistant Resists termites, fire, decay, and mold Weathers without splintering Low maintenance
ACCOMPANYING GRO PRODUCTS	GRO PEDESTALS GRO WOOD DECK TILE FASTENING KITS
