

GRO BALLAST GRID

GRO Ballast Grid is a concrete permeable paver grid that provides a strong, yet breathable foundation. It offers excellent erosion control and can be used to mitigate wind uplift in wind zones on roofs. The voids within the grid can be filled with a variety of material; including gravel, soil, turf, and/or plants, depending on the application, to create functional and attractive permeable spaces. It also can be used at ground level as a surface for both pedestrian and low-use vehicular areas. MADE IN THE USA product.

MATERIAL	Concrete
DIMENSIONS (H x W x D)	15 5/8" x 23 7/8" x 3 1/8"
APERTURE SIZE	3 5/8" x 3 5/8"
WEIGHT	60 lbs. each
COLOR	Pewter
USES	Rooftops, Walkways, and Parking Areas
COMPRESSION STRENGTH	5,000 psi
CONCRETE SPECIFICATIONS	Manufactured to ASTM C1319 Standards Tested in accordance to C140 Methods
