

## GRO CONCRETE CURB EDGING

GRO Concrete Curb Edging, designed for durability and function, is an attractive edging solution for defining and separating spaces on green roofs and amenity decks. With a diverse range of applications, it can be used to retain green roof vegetative systems or as a decorative edge for walkways, decking, and turf or play areas. Made of precast concrete and available in a variety of colors, GRO Concrete Curb Edging is a low maintenance and versatile edging product.
