

K71 Traffic Post

Bicycle and Pedestrians Bold Measures take Bold Product Solutions

Protected Bike Lanes

Over the past 20 years, US Reflector K71 flexible post has helped redefine bike lanes across north America. The K71 bollards wide body design provides a much greater visual separation of traffic and bicycle lanes when compared to thinner commonly used traffic posts designed for work zones.

The K71 post is equipped with 2 recessed 4-inch reflective colors providing excellent nighttime visibility. Easy to install and remove the K71 post has become part of the Vision Zero program helping redefining safer roadways for the future.

The K71 post 7.5-inch diameter helps motorists and bicyclists identify bike lanes from standard thin construction posts.

Bicycle impact safe, collapsible, no sharp objects, 29 inches height for safe handle bar passage, Installation: Quick and easy single point anchoring
